

## Get to Know iMac

### Dual Core Performance

The world's best designed and easiest-to-use desktop just got faster. Now with the Intel Core Duo processor with two execution cores on a single chip — iMac brings a new generation of power to the amazing things it can do.

### Twice the Horsepower

The Intel Core Duo processor and a whole new architecture give iMac literally twice the horsepower it had previously.

### iMac Performance Benchmark

SPEC performance: 2 to 3 times faster than 20-inch iMac G5 with 2.1GHz PowerPC.

2-3x Faster	iMac G5 2.1GHz	iMac Core Duo 2.0GHz	Δ
SPECint_rate_base2000 Integer calculation (estimate)	10.2	32.6	3.2x
SPECfp_rate_base2000 Floating-point calculation (estimate)	13.0	27.1	2.1x

### The Center of Your Digital Life

The iMac includes Mac OS X Tiger and the iLife '06 suite of applications, making it perfectly tuned to serve as the center of your digital life. Create photo albums, watch or make a movie, manage your email and much more — right out of the box.

### All-in-One Design

From hard drive to stereo speakers to SuperDrive and more, all the components of the iMac are enclosed within the widescreen flat-panel display. It's thin, clean and strikingly gorgeous.

### Video and Photos Made Easy

The iMac sports an iSight camera built right in almost invisibly above the display. It works with iChat AV for incredibly easy video conferencing. You can even record a video right at your desk using iMovie HD. With Photo Booth software, you can snap pictures — with the iMac's display acting like a flashbulb. Once you've taken your picture, Photo Booth lets you add fun effects before sharing it over email or saving it as your buddy icon.

### Put on a Show

Pick up the included Apple Remote, find a comfortable chair and treat yourself — or a crowd — to a show. The Front Row interface lets you summon forth your music, movies and photos from across the room.

### Built-in Wireless

The iMac lets you jump right in to the wireless world with two advanced technologies built in. AirPort Extreme lets you connect to any industry-standard, 802.11g-compatible wireless network. And Bluetooth 2.0+EDR offers fast connections to peripherals such as cell phones, mice and keyboards, PDAs and more.
